## **Brandywine of DeLand Facebook Page**

### **Policy**

The Communications committee will set up and manage a “closed” Facebook group for residents of the Brandywine subdivision, and for non-residents of Brandywine whose membership in the group is in the best interest of the community. Anyone may access the page on the web, but membership in the group requires the approval of an administrator. The Facebook group will exist for the members to interact socially. The business of the Brandywine Homeowners Association is not intended to be shared or discussed on this forum. The Communications committee reserves the right to block a member who does not adhere to the Rules of Use.

### **Procedures**

Anyone may request access to the closed group by clicking the 'join' button. Access will be pending until approved by an administrator. Members agree to follow the Rules of Use. Each pending request by a Brandywine resident will be reviewed by the Committee. An administrator will approve a pending request or respond to the individual with a reason for denial. Requests by non-residents of Brandywine will be approved after verification by an administrator that the person has a legitimate, personal Facebook page and has a genuine interest in the Brandywine community.

### **Rules of Use**

The Communications committee will monitor the Facebook page and remove any derogatory, argumentative, or off-color posts that it deems inappropriate. Any post, including photos, may be removed immediately by a single administrator if the administrator deems the post to be extremely inappropriate. An administrator may request a review by another administrator if a post is deemed to be questionable. The purpose of the group is to encourage positive social interaction and communication among its members. Everyone is welcome to post photos, events, and comments. However, the Facebook account is not a forum for sharing political views, religious views, or the business of the Homeowners Association. At the discretion of the committee, a Facebook member's status may be blocked depending on the nature of the violation.
